BENCH BREMA WITHOUT BACKREST

AP061P/E

Finitura /Finishing

GALVANIZED AND PAINTED

Bench Brema's structure is made of two steel sheet robust lateral sides, conveniently bent and drilled for ground anchoring.

Seat is composed by a galvanized and painted steel frame, to which are fixed the timber slats section 45x45 mm.

Pine wood slats are pressure treated, according to DIN 68800-3 norms, in order to preserve them from fungi, bacteria, mould and protect them from strong weather conditions.

The whole bench is composed by the two lateral sides, the frame of the seat and the wooden elements.

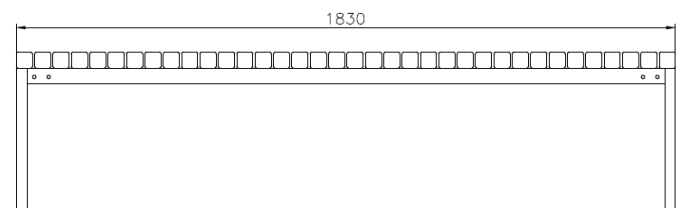

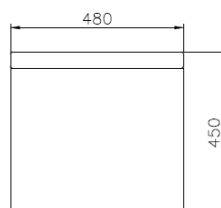

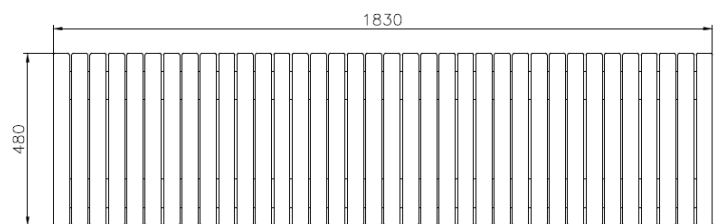

Upon request hardwood can substitute pine wood and a couple of armrests can be supplied.

All metal parts are galvanized and painted.

All screws are in stainless steel.
