BIKE RACK DELTA

AR024

Finitura /Finishing

GALVANIZED AND PAINTED or STAINLESS STEEL

Bike Rack Delta is composed by a main spiral made in tube $\varnothing 22$ mm, welded to a couple of horizontal tubulars $\varnothing 48$ mm.

Two brackets in steel plate 5 mm thick are welded at the two extremities and are conveniently drilled to be fixed with screws to lateral supports.

The two laser-cut sides are realized with a 90-degree angle and are supplied with holes for ground anchoring with bolts.

Bike rack Delta can be completely realized in galvanized and powder coated steel or in stainless steel.

It can have 5, 7 or 9 bike places.

All screws are in stainless steel.

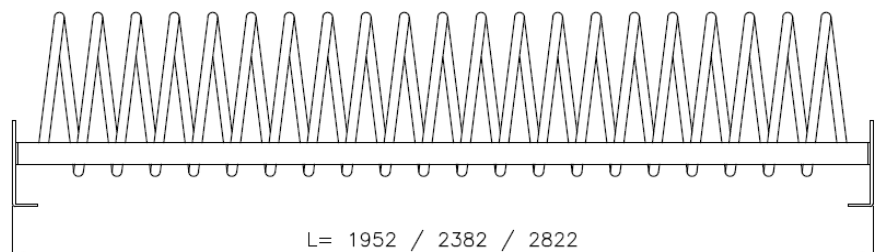

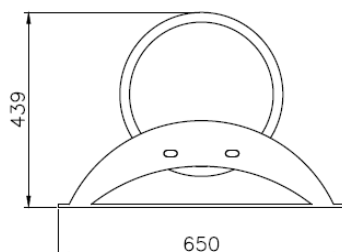

With a modern and simple design, it is suitable for many different locations, like schools, bus and train stations, offices ... and it is resistant to strong weather conditions.
