**LITTER BIN ALGHERO**

**AC026C/F**

Finitura /Finishing

**GALVANIZED AND POWDER COATED**

Alghero is a cylindrical litter bin, completely realized in 10/10 thick galvanized steel sheet, with reinforcement ring on the top and on the bottom realized in calendered steel plate 30x5, which guarantees stability and robustness.

The trash can be introduced through the two lateral holes in the cylindrical body.

The 4 mm thick lid can be opened and it has a hole in the centre for the insertion of the removable ashtray; the lid is fixed with an hinge and can be locked to the body with universal key lock.

The bin is provided with inner container

The base of the bin can be realized in concrete, or it can have a metal round 2 mm thick base  $\varnothing 490$ .

All metal parts are galvanized and powder coated, available in different RAL colours.

Screws are in stainless steel.
