BENCH AMBURGO CIRCULAR

AP036A/E

Finitura /Finishing

GALVANIZED AND PAINTED

Circular Bench Amburgo has a main structure realized in galvanized and powder coated steel. The legs are 8 mm thick and are equipped with base plates for the fixing to the floor by the means of bolts.

The seat is made of timber slats, which can be either in pine wood (treated in autoclave following european legislation DIN 68800-3 to preserve it from fungi, bacteria, insects and strong weather conditions) or in hardwood.

They are fixed to the metallic structure through stainless steel screws.

Circular Bench Amburgo is composed by 4 sectors 90°.
