COVER LARUS BIKE

AT001/2

Finitura /Finishing

GALVANIZED AND POWDER COATED

Larus Bike is a modular cover composed of two lateral supports in steel tubular \varnothing 121MM (which can arrive up to 152 mm for bigger bespoke covers) and of 8-mm-thick steel sheet sides, which are duly bent and laser-cut.

The roof can be made in 6-mm-thick alveolar polycarbonate or in 4-mm-thick compact polycarbonate and it is supported by tubular beams 50x30 mm, that are fixed to the lateral sides with screws and aluminium profiles with gaskets.

At the back, the cover is provided with a 15/10 steel sheet gutter for the collection and drainage of water.

The anchoring to the ground is to be done with 12 mm thick base plates \varnothing 450 MM, with 4 holes for the fastening with bolts or M16 ground anchors.

The bike rack can be laterally fixed with screws to the load-bearing columns of the cover, or a different kind of bike rack with ground anchoring with bolts can be chosen.

The cover can be realized also in the double-sided variation.

All metal parts are galvanized and powder coated in different RAL colours. Stainless steel screws.

TECHNICAL INFORMATION

Dimensions 3100 x 2500 mm (one-sided)
3100 x 4087 mm (double-sided)

Height 2490 mm
