BIKE RACK / BARRIER ROMA

Finitura /Finishing

GALVANIZED AND POWDER COATED

Bike rack Roma is made through the cold calendering of a steel tube $\varnothing 48$ mm or $\varnothing 60$ mm, and can be supplied with or without middle crossbar, welded to the main structure.

It is available with extended legs to be fixed into concrete or, upon request, with drilled base plates for the anchoring to the ground with bolts.

As option it can be supplied in its removable version, with steel bushing to be concreted in and ring for the padlock.

All metal parts are galvanized according to UNI legislation into force and secondly powder coated according to Helios standard range of colours.

Upon request, some reflecting bands can be applied (H 10 mm class 1).
