

Item

Code

**LITTER BIN CUBO**

**AC057C**

Finishing

**GALVANIZED AND POWDER COATED**

Square-shaped Litter bin designed for the separate collection of waste.

The container is made of a duly-bent laser-cut steel sheet th. 2 mm.

The shape of the litter bin, as to say its main frame, creates a lid that protects from the rain and from the introduction of too voluminous rubbish.

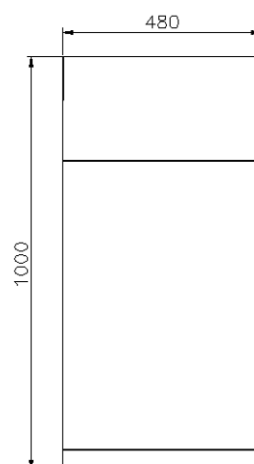

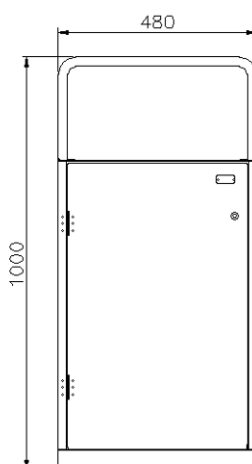

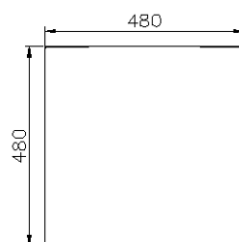

It is supplied with an inner container in hot dip galvanized steel.

The emptying occurs through the frontal door, which is provided with a universal key lock.

Its base is duly drilled for the fixing to the ground with bolts.

Screws are in stainless steel.

All metal parts are galvanized and powder coated in different RAL colours, according to the separate waste collection.
