LITTER BIN GENOVA

AC014

Finitura /Finishing

GALVANIZED AND POWDER COATED

Litter bin Genova is realized with an elliptical-shaped container L.465xH.570 mm made in perforated steel sheet th. 12/10, with square holes dim. 10 mm and with a steel-bag holder made with a galvanized steel rod $\varnothing 6$ mm.

The container is fixed through central pins to the two lateral supports made in squared tubular steel 60x60 th.2 mm, which are provided with a decorative sphere $\varnothing 60$ mm in forged steel, connected together by a steel lid 3 mm thick at the top and in the lower part by a squared steel tubular 30x30 th. 2 mm.

Litter Bin Genova can be supplied with base plates 150x150 th.5 mm for the anchoring to the ground with bolts or with 20 cm extended legs to be fixed into concrete.

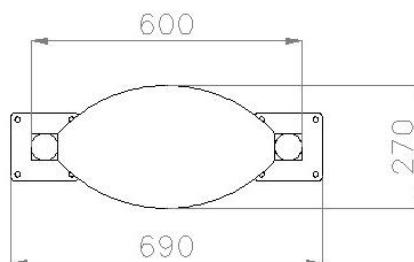

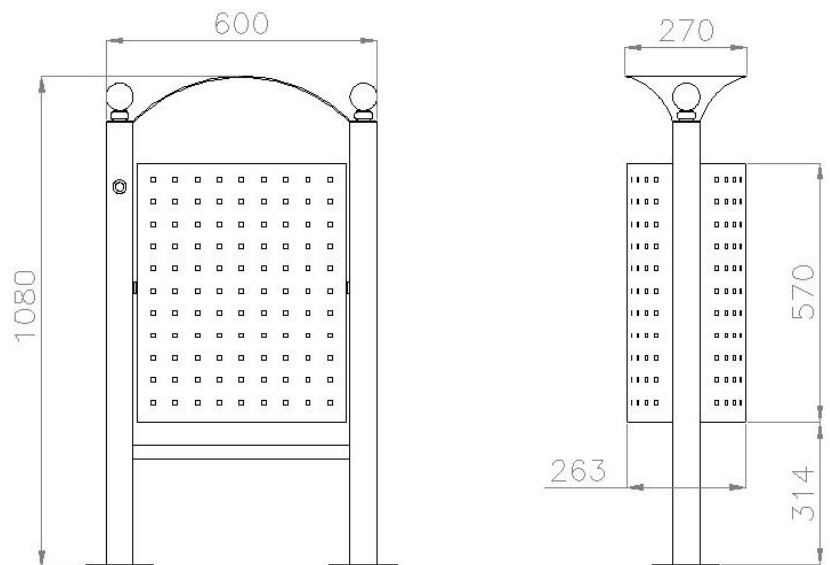

The unlocking through a supplied universal key permits the tilt-out opening of litter bin Genova.

All metal parts are galvanized and powder coated according to Helios standard range of RAL colours; screws are in stainless steel.

It can be set up for the installation of an advertising panel on the container. Litter bin Genova is supplied not assembled, together with screws and installation instructions.
