LITTER BIN OLBIA

AC006

Finitura /Finishing

GALVANIZED AND POWDER COATED

Elliptical-shaped litter bin made entirely of sheet metal with a flat inner frame, a bottom and an upper lid that guarantee stability and non-deformability of the container.

In the center of the upper lid is the ashtray, which can be removed for emptying.

The bin is opened via the front door equipped with a lock with a universal key, in the upper part of which is located the hole for the introduction of waste.

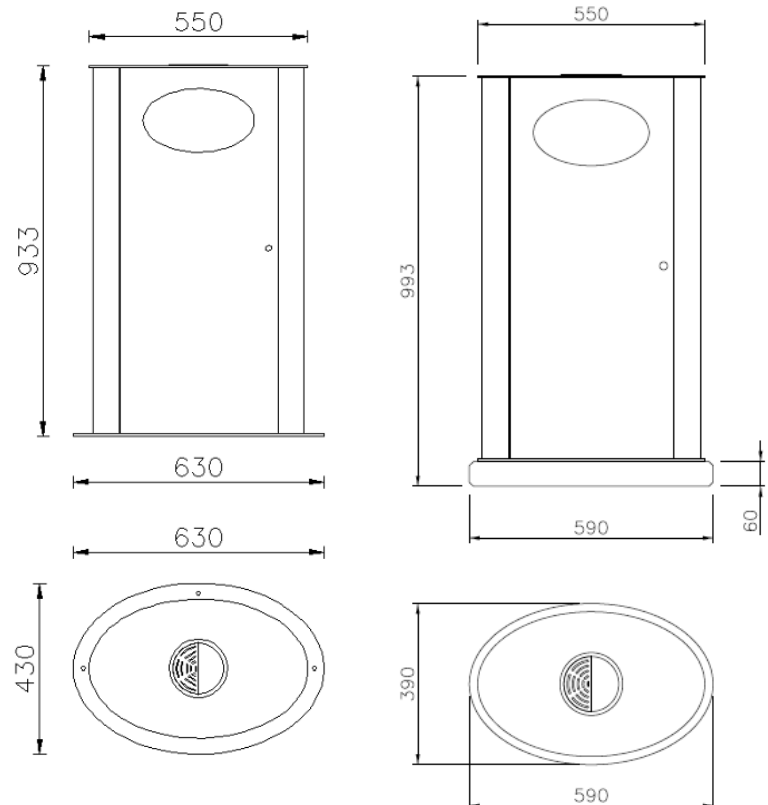

The waste sack is hooked onto a steel ring on the inside.

All metal parts are galvanized and painted with thermosetting polyester powders; the hardware is stainless steel.

The litter bin can be supplied with a steel flat base for anchoring to the ground or with a self-standing concrete base.
