**SET AMBURGO**

**AA015P**

Finitura /Finishing

**GALVANIZED AND POWDER COATED**

Set with load-bearing structure in galvanized steel painted in the various RAL colors.

The sides of the table and of the benches are made up of two sturdy shoulders in 8mm-thick steel sheet on which the base plates are welded in order to fix the structure to the ground with expansion plugs.

In the upper part of the supports the plates where the wooden slats are fixed are welded.

The seats and the table top are made of thick Nordic pine slats impregnated in autoclave in accordance with DIN 68800-3 standards to preserve the wood against fungal attack, mould and weathering.

Hardwood can substitute Pine on request.

In order to give stability to the seat, a reinforcing tie-rod is fixed centrally by screws, which serves also as footrest.

The supplied screws are in stainless steel.

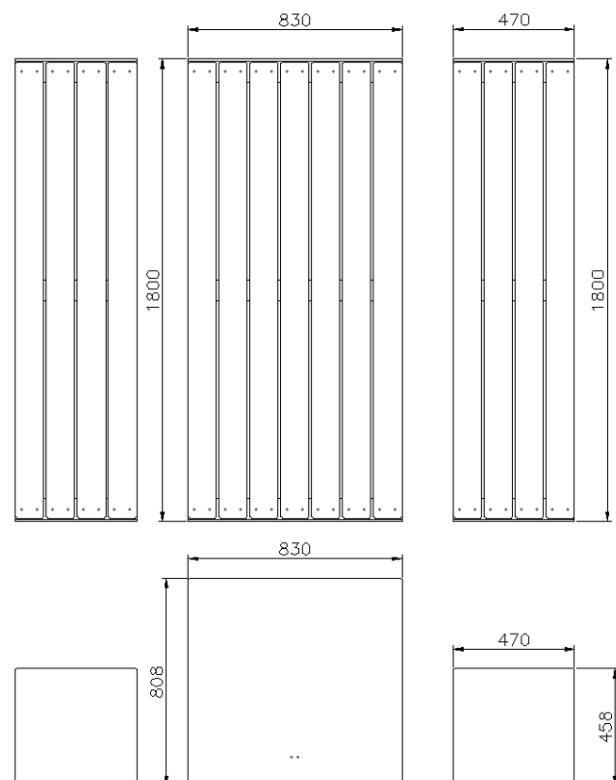

## TECHNICAL INFORMATION

Dimension 1800x470 mm (bench)  
1800x830 mm (table)

Height 458 mm (bench)  
808 mm (table)

Approximate weight 270 Kg
