SET SPACE

AA012

Finitura /Finishing

GALVANIZED AND POWDER COATED

Set Space is composed of a table and two benches (that can be bought separately). The table is realized with a galvanized and powder coated steel structure composed of two legs in steel plate, laying on a rectangular base that can be anchored to the ground with bolts; slats in pine wood that form the table top are fixed with screws to a plate at the top of the legs; wooden slats are pressure treated (without chormate), in order to protect them from the attack of fungi, molds and atmospheric agents.

The benches have the same features of the table.

The structure can be painted in various RAL colours and slats can be supplied in hardwood.
